Implemented by
CHAITANYA KALA BHARATHI
NANDYAL
Andhra Pradesh – India

PREAMBLE

Akumalla and Narayanapuram villages of Nandyal District are the among the most backward schools in Nandyal district of Andhra Pradesh. Both the villages have high schools with classes running from 3rd class to 10th class. The student strength together is around 800 students of both sexes.

Having noticed that there is no safe drinking water facility in these schools, and reported health issues among the students, most of them being due to drinking water issue, CKB has submitted a proposal to SOS ENFANTS ABANDONNES ASBL, Belgium seeking grant-in-aid to install safe drinking water systems in both these schools.

It is due to their kind consideration, and sanction of project, the work of providing safe drinking water was taken up and successfully completed by CKB.

THE WORK AT AKUMALLA ZP HIGH SCHOOL

Chaitanya Kala Bharathi has contacted the local Gram Panchayath and requested them to make arrangements to extend water supply upto the school campus. We are thankful to the Gram Panchayath who have stick to their promise and made the provision of connecting the school campus to the main water supply pipeline.

As soon as the work is completed, CKB has initiated the work of placing orders for the supply of RO Unit for the school and other requirements. The suppliers have come up with the needy material and their technical staff started their work of installing the RO Unit and the overhead tank in all technical aspects without compromising on any issue related to qualitative aspects.

The work was completed in 3 days, and the school was provided with safe drinking water system.

INAUGURATION OF THE UNIT

Soon after the successful installation of the unit, we in coordination with the school staff, have planned to organize the inauguration of the unit. In this connection the date for this event was fixed as 30th September 2023. We have invited Mr. Eswaraiah, Mandal Education Officer (MEO), and Mr. Kasenna, Chairman, School Parents' Committee (SPC), along with Mr. Ramachandra Reddy, Head Master and the school staff.

The MEO requested CKB to send special thanks to SOS ENFANTS ABANDONNES ASBL for

their humane support of installing this facility in the school campus, which helps the children to consume healthy water. He appreciated the efforts to CKB for taking such a great effort of approaching the Donor, convincing them, and making this project come true. The quality tests conducted by the technical staff at the time of installation of the unit

have revealed that the contamination has been eliminated to the highest level and the water is highly safe for drinking after the installation of this unit. The Chairman of SPC, the Headmaster, staff and children also expressed their heartfelt gratitude for the facility provided to the school children.

THE WORK AT NARAYANAPURAM ZP HIGH SCHOOL

In this village also, Chaitanya Kala Bharathi has contacted the local Gram Panchayath, and requested them to make arrangements to extend water supply upto the school campus, which the GP has agreed to provide. Accordingly, the provision of connecting the school campus to the main water supply pipeline was also completed within 15 days of time.

Soon after this working of water supply was done, CKB has initiated the work of placing orders for the supply of RO Unit for the school and other requirements. The suppliers have come up with the needy material and their technical staff started their work of installing the RO Unit and the overhead tank in all technical aspects without compromising on any issue related to qualitative aspects.

The work was completed in 3 days of time, and the school was provided with safe drinking water system.

INAUGURATION OF THE UNIT

Soon after the successful installation of the unit, the inauguration of the unit was planned to be done on 13th October 2023. We have invited Mrs. Pallapu Subbamma, Chairman, School Parents' Committee (SPC), along with Mr. Shaik Mohammed Rafi, Mr.

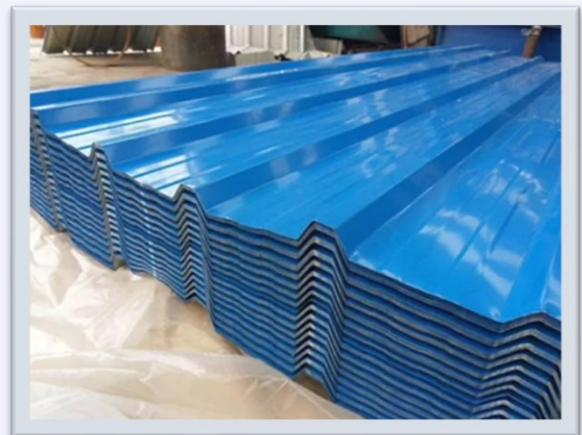

C.B. Maddileti, Maths Assistant from the school along with other staff members and the students.

During the well organized inaugural meeting, the chief guest have requested CKB to convey their gratitude to SOS ENFANTS ABANDONNES ASBL, Belgium for coming forward to support the school with the installation of this very needy RO Unit. They have also requested CKB, to continue their work towards the development of schools and for the promotion of schooling among the children, with special focus on the Tribal families and their children.

Our Gratitude to SOS ENFANTS ABANDONNES ASBL

It is a pleasure to Chaitanya Kala Bharathi, to express its gratitude to SOS ENFANTS ABANDONNES ASBL, on behalf of the communities in these two villages and the school staff and students. The issue of unsafe drinking water is a big problem in most of the parts of this area, with specific focus on the tribal zones.

In Akumalla village, during the inauguration ceremony, the Parents Committee Chairman, Mr. Kasanna has requested CKB to forward a request on behalf of his and the School Children requesting SOS ENFANTS ABANDONNES ASBL, to look into supporting the school children to construct a dining hall so that the children can have their lunch in a comfortable fashion. He has informed that the children sit in the open place in the school compound, and during the rainy season, they are facing a lot of problems to have their lunch as the entire compound turns muddy and shabby with rainwater stagnated in the school compound. So, he requested us to forward a proposal to see if a convenient shed can be constructed in the school premises with wall around and a zinc / metal sheets on top so that the children can comfortably sit and have their lunch.

Therefore, we take this opportunity to share this information with you with a humble request to see if there is a possibility to take up this work for the benefit of the students. As the zinc/metal sheets are not very expensive the construction work can be completed in a sizeable amount of grant.
