It is a privilege to present the Annual Report of Chaitanya Kala Bharathi, Nandyal, summarizing our efforts and achievements during the financial year 2025–26. Throughout the year, our team has remained steadfast in empowering local communities, fostering developmental progress, and driving meaningful change at the grassroots level. This report not only highlights our key programs and financial stewardship, but also celebrates the resilience and collective spirit of the people we serve. We remain deeply grateful to our stakeholders, donors, and partners for their unwavering trust and continued support.

GLOBAL COMPASSION INC, USA

During the financial year 2025–26, **Global Compassion Inc., USA** served as a key institutional partner for Chaitanya Kala Bharathi, providing vital financial and organizational support across three distinct humanitarian initiatives. Their holistic sponsorship enabled us to address critical grassroots needs, ranging from essential infrastructure and daily nutritional care for elderly residents at our Senior Citizen Home in Velgode, to empowering marginalized Dalit and Tribal young women through targeted vocational digital training.

The following sections provide a detailed report on each of these three supported programs, highlighting their execution, outcomes, and community impact over the past year.

SENIOR CITIZEN HOME & WATER SECURITY INITIATIVE, VELGODE

Chaithanya Kala Bharathi operates a dedicated Home for Senior Citizens in Velgode village, providing shelter, nutritious meals, and essential care to elderly residents with the support of generous institutional donors and compassionate individuals.

To resolve ongoing water access challenges for the inmates, CKB partnered with **Global Compassion Inc., USA**, securing a generous grant of **\$1,000** sponsored by **Ms. Moureen**.

Implementation & Impact Upon receipt of the funds, the project was executed immediately:

- **Borewell Drilling & Motor Installation:** A borewell was drilled on-site and equipped with a submersible motor for reliable water extraction.
- **Storage Infrastructure:** A raised cement pillar was constructed to support a newly installed water cistern connected directly to the motor system.
- **Direct Community Benefit:** The integrated water system now ensures uninterrupted daily water access for all residents, significantly improving their living conditions and dignity.

We extend our heartfelt gratitude to **Ms. Moureen** for her extraordinary kindness and philanthropy, and to **Global Compassion Inc.** for making this vital utility project possible. On behalf of the residents and staff, we thank all our patrons whose support makes this sanctuary possible.

NUTRITIONAL SUPPORT FOR ELDERLY RESIDENTS

In a continuing effort to strengthen humanitarian support for our residents, **Global Compassion Inc., USA** extended vital financial assistance to cover the daily grocery and nutritional expenses of the Velgode Senior Citizen Home.

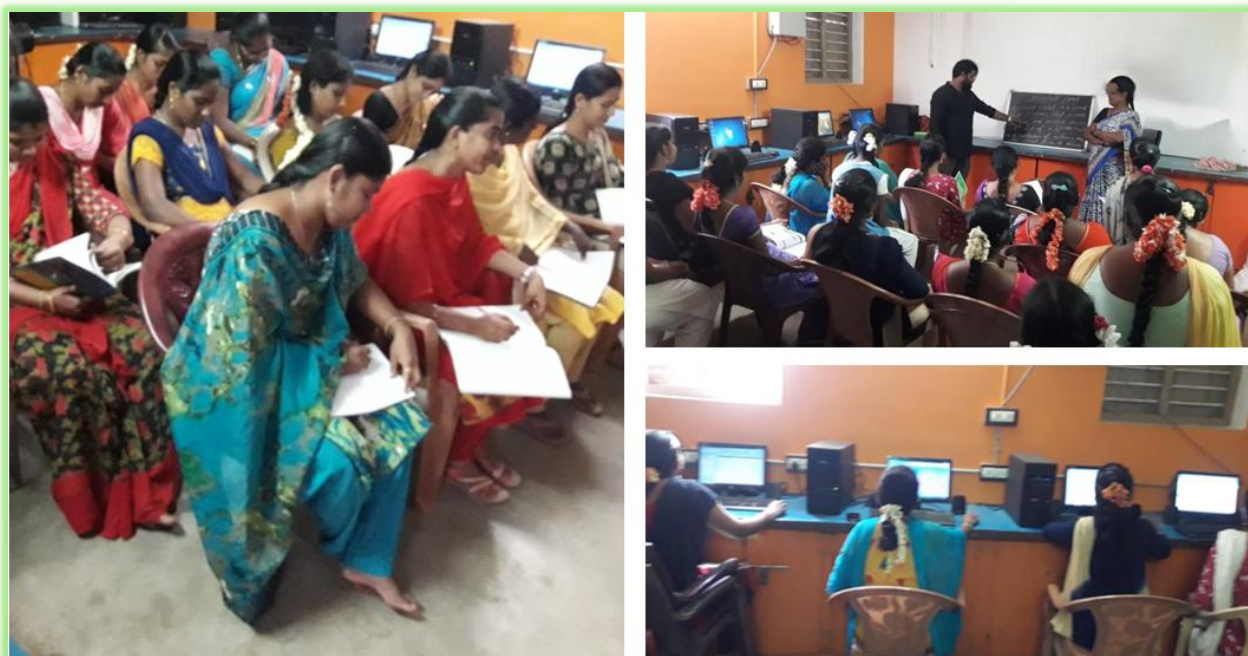

This timely support directly addressed the daily dietary needs of our elderly residents, ensuring they receive balanced, wholesome, and timely meals. By alleviating the financial strain of ongoing food procurement, this initiative allowed the organization to maintain a high standard of health, dignity, and care for the vulnerable seniors under our shelter.

Impact & Gratitude

- **Improved Nutrition:** Ensured continuous provision of fresh, balanced meals tailored to the health requirements of senior citizens.
- **Operational Stability:** Provided crucial relief for daily running costs, allowing CKB to focus resources on overall resident well-being.

We express our deepest gratitude to **Global Compassion Inc.** for their unwavering empathy and generous partnership. Their commitment to improving the lives of helpless senior citizens continues to be a cornerstone of our service in Velgode.

COMPUTER LITERACY TRAINING FOR RURAL YOUTH

With the valuable support of **Global Compassion Inc., USA**, Chaitanya Kala Bharathi established a Computer Literacy Training Centre in Velgode Town, Nandyal District, dedicated to empowering rural Dalit and Tribal girls. A cohort of 30 young women enrolled in this intensive 6-month capacity-building program designed to bridge the digital divide and enhance employability.

Curriculum Highlights

- **Operating System Fundamentals:** Hands-on training on computer hardware and software basics, file management, system operations, and essential system commands.

- **Microsoft Office Suite:** In-depth practical modules covering MS Word (document processing and report design), MS Excel (data management and basic calculations), and MS PowerPoint (presentation creation).
- **Digital Literacy & Internet Applications:** Navigation techniques, safe internet browsing, web searching, and essential communication tools.

Key Outcomes & Impact

- **100% Retention Rate:** Demonstrating exceptional enthusiasm and dedication, all 30 enrolled students successfully completed the full 6-month course without a single dropout.
- **Empowerment & Digital Inclusion:** Equipped participants with foundational digital skills, opening up opportunities for higher education, administrative roles, and self-reliance.

We extend our sincere appreciation to Global Compassion Inc. for enabling this transformative skill-development program for marginalized young women in our community.

SOUTH INDIA CHILDREN'S EDUCATION AND WELFARE TRUST (SICEWT), UK

During the reporting financial year 2025–26, the **South India Children's Education and Welfare Trust (SICEWT), UK** extended invaluable support to brighten the futures of children from vulnerable and socio-economically marginalized families. Through this meaningful

partnership, Chaitanya Kala Bharathi successfully implemented two targeted initiatives designed to address the educational and developmental needs of these young learners.

The following sections outline the detailed execution, progress, and community impact of each of these two initiatives.

EDUCATIONAL, HYGIENE & MOBILITY SUPPORT FOR VULNERABLE GIRL STUDENTS

Implementation & Overview Chaithanya Kala Bharathi (CKB), with funding from the South India Children's Education and Welfare Trust (SICEWT), UK, executed a phased distribution program across Adoni, Kurnool, and Nandyal in July and August 2025. The initiative identified and supported vulnerable, HIV-affected girl children from 45 villages studying across 28 schools, providing them with essential academic materials, sanitary kits, and bicycles.

Key Highlights

- **Target Demographic:** 62 girl students in classes 6th through 10th across the Adoni, Kurnool, and Nandyal divisions.
- **Resource Distribution:** All 62 students received study materials (including notebooks, geometry boxes, and stationery) alongside sanitary pad kits.
- **Bicycle Allocation:** 36 bicycles were provided specifically to students in the 8th, 9th, and 10th classes (including one Urdu medium student) to facilitate transportation.
- **Stakeholder Involvement:** Distribution events featured chief guests including medical officers, Dr. Bishop Daniel Prem Kumar, and representatives from the NESTAM Positive Network.

Major Impact & Beneficiary Benefits

- **Academic Unhindered:** Providing school bags, comprehensive study materials, and bicycles removes physical and financial barriers to education, encouraging the girls to focus on their academic performance.
- **Health & Menstrual Hygiene:** The provision of sanitary napkins directly addresses the health and hygiene needs of adolescent girls, promoting better menstrual care.
- **Stigma Reduction & Psychological Empowerment:** Medical experts provided vital counseling, reassuring the children that HIV/AIDS is not casually communicable and that with proper food and medication, they can lead normal, confident lives in society.

BICYCLE DISTRIBUTION FOR VULNERABLE GIRL STUDENTS

Through the compassionate, sustained partnership of **SICEWT, UK**, Chaitanya Kala Bharathi (CKB) distributed bicycles to **33 girl students** in December 2025. This initiative directly supports young girls navigating acute family health crises, social backwardness, and severe economic distress—factors that frequently threaten to derail a child’s education.

Prior to this intervention, students relied on shared auto-rickshaws, exposing them to daily financial strain, physical exhaustion, and uncomfortable public interactions. Owning a bicycle removes dependence on costly, unpredictable transport, restoring their dignity, agency, and energy to focus on academic success across Grades 7 through 9.

To ensure a seamless process for families, distribution ceremonies were organized at two accessible hubs: **Faith Home, Adoni** (19 beneficiaries) and **Nestham Office, Kurnool** (14 beneficiaries), with parents and caretakers present.

The cohort comprises 6 students studying in 7th standard, 14 students in 8th standard, and 13 students in 9th standard, bringing the total to 33 young beneficiaries across Alur and Adoni mandals.

Key Outcomes & Transformative Impact

- **Freedom & Privacy:** Eliminates reliance on shared transit, shielding vulnerable girls from social stigma and public discomfort.
- **Financial & Physical Relief:** Reduces daily commuting costs for families burdened by medical expenses while ensuring students arrive at school energized.

- **Enhanced Confidence:** Empowers young learners to take ownership of their educational journey with independence and self-worth.

Expression of Gratitude

The distribution events were a poignant celebration of community care and resilience. CKB extends its heartfelt appreciation to **SICEWT, UK** for their steadfast commitment to breaking cycles of vulnerability and keeping young girls in school, one pedal at a time

FUNDACIÓN ROVIRALTA, SPAIN,

INSTALLATION OF SOLAR WATER HEATING SYSTEMS FOR STUDENT HEALTH & HYGIENE

Chaitanya Kala Bharathi

financial support from

(CKB), with generous

Fundación Roviralta, Spain,

successfully installed four (4) high-capacity Solar Water Heating Systems to improve health and living conditions for rural schoolgirls.

This infrastructure was installed at the Mahatma Jyothi Pule BC Welfare Residential School & Junior College for Girls in Nerawada village, Panyam Mandal, Nandyal District. The facility was formally inaugurated by the institution's Principal, Sri J. V. Panduranga Rao, alongside teaching staff and CKB representatives, establishing a durable, eco-friendly green energy asset for the campus. By harnessing renewable solar energy, the system completely eliminates added electricity costs for the hostel administration while reducing reliance on the conventional power grid.

The impact and health benefits are significant, as it directly serves about 850 girl students from Classes 5th to 12th who reside in the hostel. Providing continuous, year-round access to warm water enables proper personal and menstrual hygiene practices with comfort and dignity, particularly during the harsh winter months. Furthermore, this facility has noticeably reduced cold-weather health issues among the students, including seasonal respiratory illnesses and skin infections caused by cold-water bathing. CKB extends its sincere gratitude

to Fundación Roviralta, Spain, for their vital partnership in safeguarding the health, well-being, and dignity of these young scholars.

The Shamdasani Foundation, Hong Kong

Relief & Food Security Support for Nomadic Families

Chaitanya Kala Bharathi expresses its deepest gratitude to The Shamdasani Foundation, Hong Kong, for their generous grant of ₹10,000. This funding enabled CKB to extend vital, need-based support to 12 vulnerable nomadic families, comprising approximately 40 members, including children, currently residing in Kaja village, Muvva Mandal, Krishna District.

These nomadic families are traditional custodians of a unique cultural practice during the Sankranthi harvest festival, adorning cows with colorful ribbons and playing traditional music while visiting farming households to offer blessings. Historically, farmer donations of food grains during the harvest season sustained these families year-round. However, due to shifting economic conditions and declining agricultural returns, this traditional support system has eroded, forcing these families to struggle daily for basic survival and food security.

To address their immediate nutritional needs, CKB utilized the foundation's assistance to assemble and distribute comprehensive Essential Kitchen Kits to all 12 families. Each kit contained a generous supply of 9 essential items: Rice, Dhal, Bengal Gram, Jaggery, Cooking Oil, Wheat Rava, Wheat Flour, Oliga Rava, and Groundnut seeds.

This timely intervention provided immediate relief, improved household food security, and restored dignity to a marginalized community that frequently falls through the cracks of mainstream welfare programs. On behalf of the beneficiaries in Kaja village, CKB extends its heartfelt appreciation to The Shamdasani Foundation for their compassion and direct support in uplifting these wandering families.

ANDHRA PRADESH VOLUNTARY HEALTH ASSOCIATION, Guntur

Conduct of International Events

With the support of APVHA, Guntur, CKB has conducted the following awareness generation activities.

- **World Cancer Day:** On 7th January 2026, an awareness program on World Cancer Day was conducted at Parnapalli High School in Nandyal district. The initiative aimed to educate students, teachers, and staff on early detection, common symptoms, prevention strategies, and the critical importance of adopting healthy lifestyle habits.

Resource persons engaged the students through informative sessions, debunking prevailing myths and social stigmas associated with the disease. The session emphasized personal hygiene, nutritious diet choices, avoiding tobacco and harmful substances, and acting as health ambassadors to spread awareness within their families and local communities.

- **World Leprosy Day Observance** An orientation and sensitization session marking World Leprosy Day was organized on 25th January 2026 at the Junior College in Velgode town, Nandyal district. The event focused on dispelling deep-rooted misconceptions about leprosy and educating young adults on early symptoms, modern curability via Multi-Drug Therapy (MDT), and transmission facts.

Speakers highlighted the social dimension of the disease, urging the youth to foster an environment of empathy, dignity, and inclusion for affected individuals. The interactive discussions encouraged students to actively counter social discrimination and report suspected cases early to local healthcare centers for timely medical intervention.

- **World NGO Day:** As a part of celebrating World NGO Day, a collaborative district-level consultative meeting was organized in Nandyal town, bringing together 22 leaders and key representatives from various voluntary organizations active across Nandyal district. The gathering served as a strategic platform to celebrate civil society contributions and discuss shared grassroots challenges.

The dialogue centered on strengthening inter-organizational coordination, sharing domain expertise in rural development and community welfare, and exploring joint

advocacy mechanisms. Participants reflected on collective strategies to maximize ground-level impact, foster community-led governance, and align voluntary sector efforts with district development priorities.

- **World Water Day Community Workshop** On the occasion of World Water Day, a focused community workshop was organized on 22nd March 2026 in Velgode town, engaging 30 women leaders from local Self-Help Groups (SHGs). The program emphasized the vital role of grassroots women as key stewards of local water security, household conservation, and sustainable resource management.

The interactive session covered practical household water conservation techniques, groundwater recharge principles, traditional water harvesting, and greywater recycling for kitchen gardens. Participants deliberated on collective action plans to promote responsible water consumption and monitor drinking water hygiene across their respective neighbourhoods.
