

Community Welfare

The issues in each village and of the communities living in those villages are different from one to other. Chaitanya Kala Bharathi, therefore, focussed with specific attention on each village.

Clean Water Access: We address acute potable water shortages by installing borewells and water cisterns. To date, we have successfully established water facilities across 17 villages. Additionally, we prioritize the repair and restoration of non-functional bores, ensuring communities have reliable access to safe drinking water without the burden of traveling long distances.

Sanitation & Hygiene: To promote rural sanitation and eliminate open defecation, CKB facilitates the construction of Individual Household Latrines (IHHLs). This initiative is a vital step toward improving public health and dignity at the village level.

Elderly Care & Support: We remain deeply committed to the well-being of our senior citizens. By identifying their specific needs, we provide essential support including food supplies, new clothing, blankets, and bedding.

Community Engagement: Through structured meetings and awareness camps, we educate and inspire community members to embrace their social responsibility and actively participate in local service activities.
