

Chaitanya Kala Bharathi places a profound emphasis on the health and nutritional well-being of the most marginalized families. Our mission focuses specifically on those often overlooked, including economically disadvantaged households, Basivini families, single-mother households, and those affected by Leprosy or HIV/AIDS.

Nutritional Security & Crisis Support

We believe that no family should suffer from hunger. Our intervention ensures a bridge to food security through:

- **Immediate Relief:** Distribution of dry ration kits to prevent starvation during periods of acute need.
- **Government Advocacy:** Acting as a liaison to represent these families to government officials, ensuring they receive their rightful long-term state benefits and rations.
- **Targeted Nutrition:** Providing specialized nutritional food packages designed to improve the health outcomes of vulnerable individuals.

Healthcare Access & Awareness

Bridging the gap between rural communities and quality medical care is a core priority:

- **Village Medical Camps:** Organizing free medical check-ups and providing essential medicines directly within the community.
- **Advanced Referrals:** Assisting patients who require specialized diagnosis or treatment by referring them to higher medical institutions.
- **Capacity Building:** Strengthening the local healthcare ecosystem by conducting specialized training for Health Workers.
- **Preventative Education:** Hosting awareness camps to educate youth and the wider community on critical health issues, including HIV/AIDS prevention and management.

Dignity in Hygiene

We empower adolescent girls and young women by promoting personal health and menstrual hygiene:

- **Essential Supplies:** Distributing sanitary napkins and hygiene kits (including soaps) to girls from economically poor backgrounds.
- **Education:** Integrating hygiene awareness into our community outreach to break taboos and promote long-term health dignity.
